WHETHER YOU WANT TO CREATE SOMETHING NEW OR JUST RENOVATING IT, REALIZE YOUR DREAMS WITH FAVORIT BETON EXCLUSIVE PRODUCTS!

Only 2-3mm thick! It can be applied to tiles, gravel without significantly increasing the layer thickness, making it the perfect solution for renovations. It can be used on virtually any substrate, be it metal, glass or wood. It can even be used to cover decor and utility items.

RELEASE YOUR FANTASY!

More than 30 colors are available!

Favorit Liquibeton

Favorit Liquibeton is a cement-based, self-leveling decorative coating containing selected additives, resins and plasticizer. It can be used as a quick finish for large surfaces. It is a smooth and silky coating with a subtle surface effect, which means it has a basically homogeneous, uniform color.

Favorit Liquibeton has a minimum thickness of 4 mm and a maximum thickness of 20 mm. The result is a smooth and silky finish with delicate surface effects. Liquibeton can only be used indoors, on any concrete screed or tile surface, even with underfloor heating.
